EXAMINER'S ACTION

Art Unit 1204

This application contains claims directed to patentably distinct species of the claimed invention.

Applicant is required under 35 USC 121 to elect a single disclosed specie for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and in listing of all claims readable thereon, including any claims subsequently added, an argument that a generic claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claims applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all of the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species MPEP 809.02(a).

Art Unit 1204

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence may be used in a rejection under 35 USC 103 of the other invention.

A telephone call was made to Hope E. Melville on 09 June 1994 to request an oral election to the above restriction requirement, but did not result in an election being made.

To be complete, applicants response must include a provisional election even though the requirement is traversed.
